

**Unwrapping the tripod legs flattened the room at 1.6-3 kHz: 0.98 → 0.93 dB.**  
**The -54° capsule beside the tripod was shadowed (-0.79 dB) and filled in (-0.17 dB). Below 1.6 kHz: little change, slightly worse.**

2026-09-23 · arc vertical · 1 l sphere on the tripod, 20 cm back along the axis · 95 tones · 11 calibrated capsules · every run 95/95 tones clean
